			MAIL DATE	DELIVERY MODE
			06/09/2008	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

**EXHIBIT J**

**Office Action Summary****Application No.**

11/160,060

**Applicant(s)**

PISONY, MURRAY WALTER

**Examiner**

GREGORY W. ADAMS

**Art Unit**

3652

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 25 March 2008.  
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.  
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1 and 3-24 is/are pending in the application.  
 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
 6) ☒ Claim(s) 1 and 3-24 is/are rejected.  
 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.  
 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
 a) ☐ All b) ☐ Some \* c) ☐ None of:  
 1. ☐ Certified copies of the priority documents have been received.  
 2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)  
 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)  
 Paper No(s)/Mail Date \_\_\_\_\_.  
 4) ☐ Interview Summary (PTO-413)  
 Paper No(s)/Mail Date. \_\_\_\_\_.  
 5) ☐ Notice of Informal Patent Application  
 6) ☐ Other: \_\_\_\_\_.

Application/Control Number: 11/160,060  
Art Unit: 3652

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over McLeod et al. (CA 2315046) (previously cited) in view of Dika (US 4,947,904) (previously cited).

With respect to claims 1, 3-6 & 12-15, 17-22, McLeod discloses an apparatus comprising:

- (a) a vehicle drive means pulling a trailer,
- (b) a receiving bin and a conveyor 15,
- (c) operatively connected to a conveyor assembly, is a unscrambling hopper 18, row conveyor 19, stacking bin 20 and bundling assembly 21,
- (d) a discharge platform 22, and
- (e) a grapple assembly (P13/L2-8).

Although McLeod et al. does not explicitly disclose a grapple arm and pivotal fingers, McLeod et al. teaches that a "grapple which lifts the pieces from a large pile" is a well known replacement for a picking and conveyor assembly 16. Page 13, lines 2-8. Dika discloses an apparatus that gathers bolts or logs and stacks them using (e) a grapple assembly including an arm 3 extending upwardly from an apparatus 2 and a grapple on

Application/Control Number: 11/160,060  
Art Unit: 3652

Page 3

an outboard end of an arm, a grapple including at least two fingers 9 sized and connected by a pivotal connection (generally indicated by FIG. 11: 8) allowing fingers 9 to be opened and closed to pick up lumber pieces therebetween and an arm being pivotally moveable to deposit lumber pieces into a receiving area 7. Dika teaches that grapples (known as "knuckle boom log loader") are "adapted to reach out and grasp one or more of the tree stems by their butt ends and drag them inwardly". C2/L65-C3/L5. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the grapple of McLeod et al. to include an arm and fingers, as per the teachings of Dika, as is well known in the art of lumber gathering and stacking.

With respect to claim 7, McLeod discloses a means (P14/L10-25) of raising and lowering a conveyor assembly.

With respect to claims 8 & 16, McLeod discloses a pivoting arrangement (P25/L1-6) for tilting a stacking assembly relative to a chassis of an apparatus to provide for substantial leveling of the stacking assembly when operating on uneven ground surfaces.

With respect to claims 9-11, McLeod discloses a method of picking up, stacking and bundling lumber, comprising:

(a) providing an apparatus that comprises:

(i) a conveyor assembly that comprises a receiving bin 16 and a conveyor 15;

Application/Control Number: 11/160,060  
Art Unit: 3652

Page 4

- (ii) a stacking assembly that comprises an unscrambling hopper 18, a row conveyor 19, a stacking bin 20 and a bundling assembly 21;
- (iii) a discharge platform 22, and
- (vi) a grapple assembly 28,
- (b) picking up loose lumber with a grapple and depositing it into a receiving bin, and
- (c) conveying loose lumber along a conveyor to a stacking assembly, where lumber is stacked and bundled into a bundle of lumber and deposited onto a discharge platform.

Although McLeod et al. does not explicitly disclose providing a grapple arm and pivotal fingers, McLeod et al. teaches that a "grapple which lifts the pieces from a large pile" is a well known replacement for picking and conveyor assembly 16. Page 13, lines 2-8. Dika discloses a method step including providing a grapple that gathers bolts or logs and stacks them using (e) a grapple assembly including an arm 3 extending upwardly from an apparatus 2 and a grapple on an outboard end of an arm, a grapple including at least two fingers 9 sized and connected by a pivotal connection (generally indicated by FIG. 11: 8) allowing fingers 9 to be opened and closed to pick up lumber pieces therebetween and an arm being pivotally moveable to deposit lumber pieces into a receiving area 7. Dika teaches that grapples (known as "knuckle boom log loader") are "adapted to reach out and grasp one or more of the tree stems by their butt ends and drag them inwardly". C2/L65-C3/L5. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify providing a

Application/Control Number: 11/160,060

Page 5

Art Unit: 3652

grapple as disclosed in the method of McLeod et al. to include providing a grapple assembly including an arm and pivotally connected fingers, as per the teachings of Dika, as is well known in the art of lumber gathering and stacking.

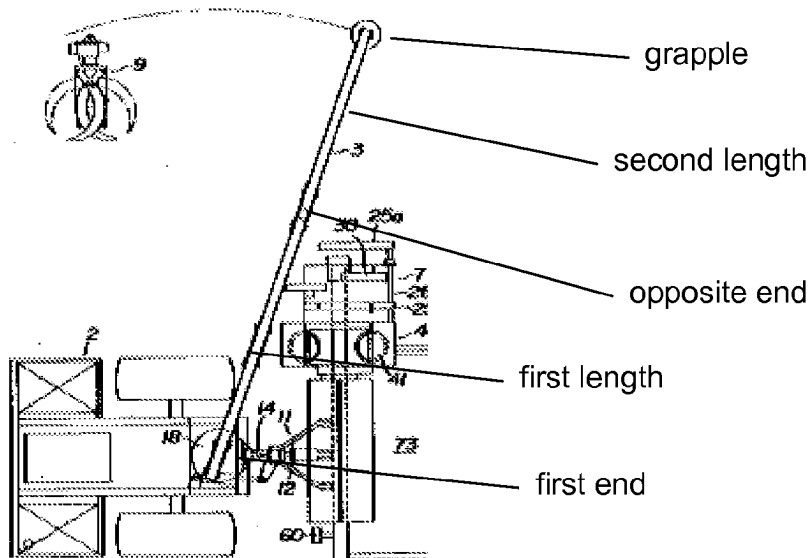

With respect to claim 23, McLeod discloses a grapple and does not disclose 360 degrees. Dika an arm pivotally mounted to rotate about a substantially vertical axis on an apparatus about 360 degrees.

With respect to claim 24, McLeod does not disclose a first length and a second length. Dika discloses an arm that includes a first length including a first end mounted for lateral extension from an apparatus and an opposite end and a second length pivotally connected to an opposite end for further lateral reach by an arm, a second length defining an outboard end to which a grapple is connected. (See FIG. 10 reproduced below.) Dika teaches that grapples (known as "knuckle boom log loader") are "adapted to reach out and grasp one or more of the tree stems by their butt ends and drag them inwardly". C2/L65-C3/L5. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the grapple of McLeod et al. to include first and second lengths, as per the teachings of Dika, as is well known in the art of lumber gathering and stacking.

## Response to Arguments

Applicant's arguments with respect to claims 1, 3-22 have been considered but are moot in view of the new ground(s) of rejection. Applicant's arguments with respect to claims 3, 7, 8, 10, 15 & 16 fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

## Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 11/160,060  
Art Unit: 3652

Page 7

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GREGORY W. ADAMS whose telephone number is (571)272-8101. The examiner can normally be reached on M-Th, 8:30am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saul Rodriguez can be reached on (571) 272-7097. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
